

chêne de l'est[®]
Handcrafted French hardwood flooring
Nature at your feet...

Know-how and craftsmanship ... Chene de l'est is a family company since 1960.
Our hardwood floors are designed and produced in France in our four production and finishing sites...

INTRODUCING CHÊNE DE L'EST

As specialists in solid and engineered French oak hardwood flooring, Chêne de l'Est crafts beautiful flooring that brings light, warmth and distinction to any style interior. Located in Hambach in the heart of the forest region of Eastern France, Chêne de l'Est was founded in 1960 by Joseph Bach. A local carpenter, Joseph started working in a small workshop originally built by his grandfather, and from these humble beginnings Chêne de l'Est has risen to become one of the first hardwood flooring companies in France. Joseph Bach's four children, Raymond, Gabriel, Jean-Michel and Brigitte are together the today's management team and are working with many other Bach family members also involved in different aspects of the operation and sharing the same hardwood flooring passion as Joseph. Chêne de l'Est is proud to offer an extensive range of hardwood floors with styles and finishes to enhance every décor. There are now over 200 different styles to choose from within our collections that included Smoked, Antique, Loft, Sawn-Face (Rough-hewn)...

Chêne de l'Est operates four facilities for production and finishing

Chêne de l'est
 24, rue de la Fontaine
 F - 57910 Hambach
 Tél. +33 (0)3 87 98.03.42
 Fax +33 (0)3 87 98.53.50
 Mail: contact@chenedelest.com

Surrounded by forestland, our headquarters and main manufacturing facility is located in Hambach. Here the raw logs are delivered and transformed through our various processes into beautiful French oak flooring. This facility has two production and one finish lines and has the capacity to produce 4 305 705 SF of solid flooring each year.

Parqueterie Lemoine
 65, rue de la Gare
 F - 88260 Darney

In order to provide the widest range of French oak flooring to our customers, we recently acquired this manufacturing facility, located in Darney, deep in the Vosges region of France.

The skilled and dedicate team at this facility produces mainly engineered flooring for our various collections but also some mosaic and industrial flooring for the French domestic market.

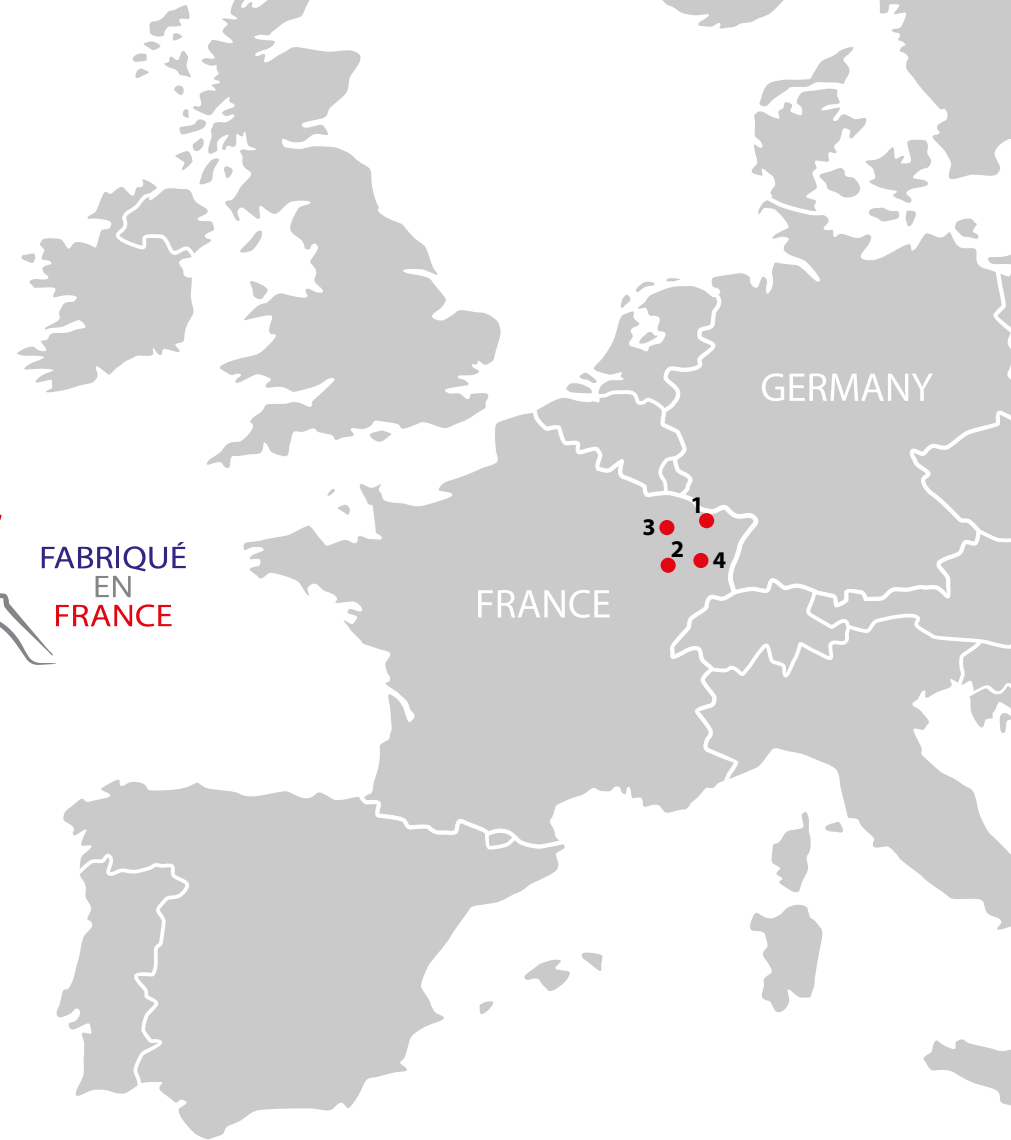

France Finition
 18, route de Bouzonville
 F - 57640 Servigny les Ste Barbe

Located in the eastern region of France, this facility contains our finish lines. Here we have the capability to pre-finish our solid and engineered floors with both urethane and oil.

Industrie Vosgienne du Bois
 Chemin de Padaine
 F - 88700 Rambervillers

A traditional sawmill, located in the center of the Vosges Mountains, this facility processes the oak logs for use in our Chêne de l'Est solid hardwood flooring.

Chêne de l'est obtained labels A+ for all the finished solid and engineered flooring

There are a total of 150 dedicated people working in the 4 production facilities.

Chêne de l'Est

Craftsmanship with dedication to quality and service

Our expertise and know-how allow us to produce a range of large stain and finishes choice proposed in desirable lengths and widths. Most of our floors are available in both solid and engineered planking. Add to this our custom and pattern capabilities and the possibilities are endless.

PLANCHER D'AUTREFOIS - PA 66 - Gris pastel - Width 5.5" (140 mm)

From the forest to your floor Nature at your feet

The Office of French National Forest oversees all aspects of our forests, including the decision of forestland sale and harvesting of trees. These decisions are made with only the health of the forest in mind and no tree will ever be harvested before it has reached maturity. Harvesting of trees is never allowed during the natural growing season which means that Chêne de l'Est must purchase all of its annual lumber needs during the harvesting season which runs from November to March.

Wood is a natural and renewable resource, and the forests thrive when proper management practices are employed. The harvesting of the forest is extremely important to its health and it is important to note that after the trees have been cut down, the forest renews itself through a combination of natural seeding, and the planting of young trees.

The yearly harvest takes less than 60 percent of the volume of the forests' annual growth so the forest area in France is constantly expanding.

Both Chêne de l'Est and the French National Forest Office understand the forests' essential role in protecting and preserving our environment.

The industry encourages sustainable forest management so that the forests can continue to be a national resource that benefits all.

Chêne de l'Est promotes and practices sustainable forest management, and is certified by the Programme for the Endorsement of Forest Certification (PEFC). If you are concerned about clear cutting, deforestation and climate change, make sure you choose a hardwood flooring product that is certified by the PEFC. Chêne de l'Est guarantees that all of our flooring is made from trees taken from forests covered by sustainable management.

CHÊNE DE L'EST is certificated PEFC / 10-31-190 - CTBA / 03-00257.

Widths: (vary by series) 2,75" / 3,5" / 4,3" / 5,1" / 5,9" (70 / 90 / 110 / 130 / 150 mm)

Lengths: width 2,75": 1,3' to 2,3' (400 to 700 mm), with microbevels on all 4 edges MGO4, with or without bevel in unfinished (to be sand).

Other widths: 1,3' to 6,5' (400 to 2 000 mm) with lightly bevels on all 4 edges PGO4, with or without bevel in unfinished (to be sand). Compatible with underfloor heating (low temperature) up to 5,9" (150 mm) wide, see data sheet.

Solid French Oak 7/8" (21/22 mm) plank flooring

Thickness: 13/16" (21 mm) (+/- for the rough-hewn, sawed oak)

Widths: (vary by series) 2,75" / 3,5" / 4,3" / 5,5" / 6,7" / 7,5" (70 / 90 / 110 / 140 / 170 / 190 mm)

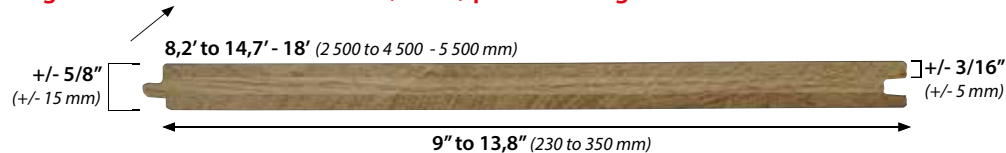

Thickness: 7/8" (22 mm) (+/- for the rough-hewn, sawed oak)

Widths: (vary by series) 2,75" / 3,5" / 4,3" / 5,5" (70 / 90 / 110 / 140 mm)

Lengths: width 2,75" (70 mm): 1,3' to 2,6' (400 to 800 mm), with microbevels on all 4 edges MGO4, with or without bevel in unfinished (to be sand).

Other widths: 1,3' to 6,5' (400 to 2 000 mm), with lightly bevels on all 4 edges PGO4, with or without bevel in unfinished (to be sanded). With tongue and groove on all four sides

Engineered French Oak XXL 5/8" (15 mm) plank flooring

Thickness: 5/8" (15 mm) (+/- for the rough-hewn, sawed oak)

Widths: 9" to 13,8" (230 to 350 mm) (11,4" (290 mm) max. in the rough-hewn, sawed oak)

Lengths: variables from 8,2' to 14,7' - 18' (2500 to 4 500 mm, up to 5 500 mm)

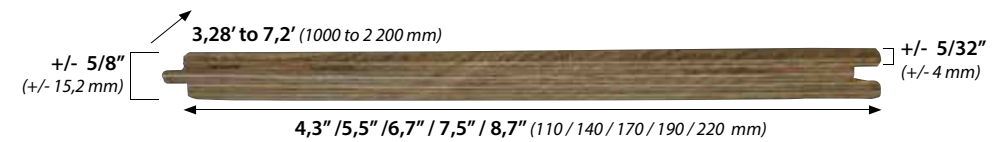

Top layer: +/- 3/16" (5 mm) (+/- for the rough-hewn, sawed oak)

Bevel: PGO 2 or distressed bevel for the antiqued colors

Middle: oak 3/16" (5 mm), **On the back:** oak 3/16" (5 mm)

Glue-down installation. Compatible with underfloor heating (low temperature) see data sheet.

TOP 4 Engineered French Oak 5/8" (15,2 mm) plank flooring

Thickness: 5/8" (15,2 mm) (+/- for the rough-hewn, sawed oak)

Widths: (vary by series) 4,3" (110 mm) (consult us), 5,5" / 6,7" / 7,5" / 8,7" (140 / 170 / 190 / 220" mm) ("consult us)

Lengths: mixed variable from 3,28' to 7,2' (1000 to 2 200 mm)

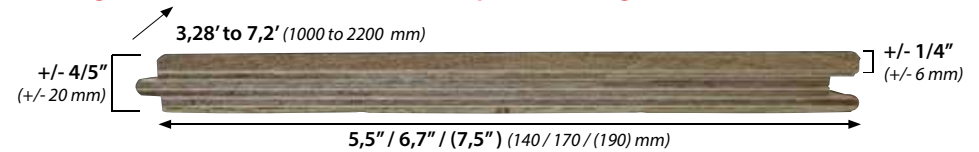

Top layer: 5/32" (+/- 4 mm) thick oak (+/- 9/64" (+/- 3,5 mm) for the rough-hewn, sawed oak),

Bevel PGO 4: lightly bevels +/- 5/64" (+/- 2 mm) on all four edges 1/16" (1,5 mm) after sanding), with tongue and groove on all four sides

Multilayer plywood: birch

Compatible with underfloor heating (low temperature) up to 8,7" (220 mm) wide, see data sheet.

TOP 6 Engineered French Oak 4/5" (20 mm) plank flooring

Thickness: +/- 4/5" (20 mm) (+/- for the rough-hewn, sawed oak)

Width: (vary by series) 5,5" (140 mm) and 6,7" (7,5") (170 (190) mm)

Lengths: Mixed variables from 3,28' to 7,2' (1000 to 2 200 mm)

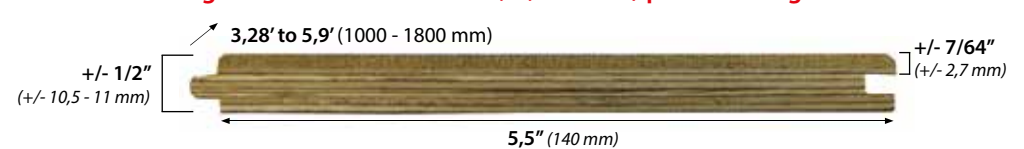

Top layer: 1/4" (6 mm) (+/- 7/32 (+/- 5,5 mm) to 1/4" (6 mm) for the rough-hewn, sawed oak)

Bevel PGO 4: lightly bevels 5/64" (+/- 2 mm) on all four edges 1/16" (1,5 mm) after sanding), with tongue and groove on all four sides.

Multilayer plywood: birch

Compatible with underfloor heating (low temperature) up to 6,7" (170 mm) wide, see data sheet.

Gamme Initiale Engineered French Oak 1/2" (10,5 - 11 mm) plank flooring

Thickness: +/- 1/2" (10,5 - 11 mm) / +/- 7/64" (+/- 2,7 mm) (+/- for the rough-hewn, sawed oak)

Width: 5,5" (140 mm)

Mixed lengths: 3,28' to 5,9' (1000 - 1800 mm)

Top layer: +/- 7/64" (+/- 2,7 mm) (+/- 3/32" to 7/64" (+/- 2,5 to 2,7 mm) for the rough-hewn, sawed oak)

Bevel PGO 4: lightly bevels +/- 5/64" (2 mm) on all four edges (1/16" (1,5 mm) after sanding), with tongue and groove on all four sides.

Multilayer plywood: birch

Compatible with underfloor heating (low temperature) up to 6,7" (170 mm) wide, See data sheet.

Choice: Plancher d'autrefois, Loft, Chêne scié, Vieux de France, Privilège café: special choice with knots, without mastic open knots for the solid plank flooring and sometimes filled for the multilayer.

Gamme Initiale: Mixed choice (+/- 60% Rustic A, +/- 30% Classic, +/- 10% First). **Gamme nature (Natural oak):** first choice: clear grade / rustic (RUA); select grade / classic (tradition); n°1 common grade

Note: Can be delivered in fix or variable widths according to their availability. In case of 2 widths, we need the same number of 1m of each width. **XXL:** big knots and cracks accepted, dark brown filler, little sapwood. **Chêne scié (Rough-hewn, sawed oak):** Risk of height difference. Thicknesses and top layer with light variations **Plancher d'autrefois:** distressed bevels. **The technical specifications are susceptible of modifications without advance notice from us.**
